Abstract

Each article must include an abstract of 150 words in Times 9 pt with interlinear spacing of 10 pt. You will copy this abstract to the first page when submitting your proposal on the website. The heading Abstract should be centred, font Times 10 bold.

Keywords: keyword A, keyword B, keyword C

1. Paper

Each manuscript should be submitted on **A4 paper**. The fully justified text should be formatted in two parallel columns, each 8.25 cm wide, and separated by a space of 0.63 cm. Left, right, and bottom margins should be 1.9 cm and the top margin 2.5 cm. The font for the main body of the text should be Times 10 pt with interlinear spacing of 12 pt. **Articles must be between 2 and 4 pages in length.**

2. General Instructions

Each paper is allocated between **a minimum of two and a maximum of four pages** including figures.

3. Page Numbering

Please do not include page numbers in your article. The definitive page numbering of articles published in the proceedings will be decided by the organizing committee.

4. Headings / Level 1 Headings

Headings should be capitalised in the same way as the main title, and centred within the column. The font used is Times 12 bold. There should also be a space of 12 pt between the title and the preceding section, and a space of 3 pt between the title and the text following it.

4.1. Level 2 Headings

The format for level 2 headings is the same as for level 1 Headings, with the font Times 11, and the heading is justified to the left of the column.

4.1.1. Level 3 Headings

The format for level 3 headings is the same as for level 2 headings, except that the font is Times 10, and there should be no space left between the heading and the text.

5. Citing References in the Text

5.1. Bibliographical References

All bibliographical references within the text should be placed in parentheses containing the author's surname followed by a comma before the date of publication (Strötgen and Gertz, 2012). If the sentence already includes the author's name, then it is only necessary to put the date in parentheses: Strötgen and Gertz (2012). When several authors are cited, those references should be separated with a

semicolon: (Strötgen and Gertz, 2012; Castor and Pollux, 1992). When the reference has more than three authors, only cite the name of the first author followed by et al. (e.g. (Superman et al., 2000)).

6. Figures & Tables

6.1. Figures

All figures should be centred and clearly distinguishable. They should never be drawn by hand, and the lines must be very dark in order to ensure a high-quality printed version. Figures should be numbered in the text, and have a caption in Times 10 pt underneath. A space must be left between each figure and its respective caption.

Example of a figure enclosed in a box:

Figure 1: The caption of the figure.

Figure and caption should always appear together on the same page. Large figures can be centred, using a full page.

6.2. Tables

The instructions for tables are the same as for figures.

Level	Tools
Morphology	Pitrat Analyser
Syntax	LFG Analyser (C-Structure)

Table 1: The caption of the table

7. Footnotes

Footnotes are indicated within the text by a number in superscript¹.

8. Copyrights

Proceedings will be published under a Creative Commons Attribution 4.0 International license

9. Acknowledgements

Place all acknowledgements (including those concerning research grants and funding) in a separate section at the end of the article.

10. References

Bibliographical references should be listed in alphabetical order at the end of the article. The title of the section, “Bibliographical References”, should be a level 1 heading. The first line of each bibliographical reference should be justified to the left of the column, and the rest of the entry should be indented by 0.35 cm.

The examples provided in Section 10. (some of which are fictitious references) illustrate the basic format required for articles in conference proceedings, books, journals articles, Ph.D. theses, and chapters of books.

Appendix: How to Produce the .pdf Version

In order to generate a PDF file out of the LaTeX file herein the following steps need to be performed:

- Compile the `.tex` file once
- Invoke `bibtex` on the eponymous `.aux` file
- Compile the `.tex` file twice

If you have `latexmk` installed you can do this with one command, for example for this file:

- `latexmk -pdf -bibtex xample.tex`
